About the System

Calsoft introduces a robust and innovative Doctor Appointment and Management System designed to simplify healthcare access for patients and empower doctors with technology. Built to support both online and offline appointments, this system offers seamless experiences from scheduling to consultations, payments, and prescription management.

Objectives

Create a user-friendly platform for booking online and offline doctor appointments.

Facilitate secure online consultations through video conferencing.

Implement seamless payment options for all services.

Enable online purchase of prescribed medicines through prescription uploads.

Develop a Doctor App to access and manage patient information.

Adapt medical forms dynamically based on patient details.

Reward doctors with commissions on prescribed medications.

Launch dedicated apps for both patients and doctors.

Key Features

Online Appointment System

Video Conference Consultations

- Secure, encrypted video consultations.
- Intuitive interface for doctors and patients.
- Schedule, reschedule, and cancel appointments with ease.

Payment Method

- Integration with credit/debit cards and online banking.
- Secure payment processing for consultations and services.

Prescription Upload & Medicine Purchase

- Upload prescriptions directly via the app.
- Integrated online pharmacy for easy medicine purchase

Automated Billing System

- Upload prescriptions directly via the app.
- Integrated online pharmacy for easy medicine purchase

Key Features

Offline Appointment System

User Appointment Booking

- Clean, user-friendly interface for offline booking.
- Calendar view showing real-time doctor availability.
- SMS and email alerts for confirmations and reminders.

Reference Design

- Designed to replicate ease-of-use seen in care.calsoftgroup.com.
- Real-time updates on appointment status.

Doctor Application

Patient Details Access

- Searchable patient database by name or ID.
- Complete access to patient history, diagnosis, and treatment.
- Secure, encrypted storage of patient data.

Adaptive Forms

- Dynamic forms adjusting to patient-specific needs.
- Custom templates for various consultation and treatment types.
- Simplified patient data input and updates.

Key Features

Doctor Profile Management

Doctor Details Creation

- Admin panel for creating and managing doctor profiles.
- Allows uploading of profile photo, setting availability schedules, and entering contact details and location.

Doctor Specialization

- Doctors can add their areas of specialization (e.g., Pediatrician, Cardiologist).

Doctor Qualification

- Doctors can add their qualifications in the admin panel.

Why Choose Calsoft?

- Fully customizable to meet your unique workflow and branding requirements
- Scalable, secure and HIPAA-compliant infrastructure
- Integrated solution for clinics, hospitals, and independent doctors
- Enhancing patient satisfaction and optimizing doctor workflows
